- **System**-A collection of components that work together to achieve a common objective.
- **Information System**- A system that provides information support to the decision-making process at each level of an organization.
- **Health Information System**- A system that integrates data collection, processing, reporting, and use of the information necessary for improving health service effectiveness and efficiency through better management at all levels of health services.
- **Health Management Information System**- An information system specially designed to assist in the management and planning of health.

- **\*HEALTHCARE INFORMATION SYSTEM (HIM)**

- Healthcare is a business and, like every business, it needs good management to keep the business running smoothly.
- Healthcare information systems means meticulously maintaining a patient's healthcare records and ensuring that confidential information is securely kept.
- Those in healthcare information systems must have tremendous attention to detail.

- **Definition**

- Health information system is that system in which collection, utilization, analysis and transmission of information is done for conducting health services, training and research.

- **Objectives**

- To provide reliable, latest and useful health information to all levels of health officers and administrators.
- To amend health policies and working system on the basis of feedback, received from health information system.
  - To provide information about periodically and time bound programmes and for mid term evaluation.
- ● To contribute towards achievement of objectives of health policies and programmes.
- To increase efficiency and quality in health management.

- **Domains/fields of health information system**

- It includes demography, vital statistics, health system input, output, health determinants, health economics, health status, health infrastructure, resources and outcome, financial statistics, environmental health statistics.
- **\*Characteristics**
- According to WHO,

- The information should be problem oriented.
- Information should be population based.
- Functional and directorial wording should be used.
- Information should be expressed in short and in imaginative form (graphs, chart, table etc).
  
- **\*Sources of HMIS**
  - Census
  - Registration of vital events( birth, death, marriage etc)
  - Notification of diseases and disease registers.Records and reports of hospitals
    - Statistics regarding environmental health.
  - Statistics regarding health resources and services.
- **\*Problems or constraints of HMIS in India**
  - Structural Multiplicity of institutions and departments  
Fragmentation of data.
    - Lack of infrastructural facilities for storage and maintenance of records.
- **\*Challenges for HMIS**
  - Low levels of public will, about vital registration system.Inadequate government's capacity and lack of firm political decision• Gender issues in vital events registration.\*Fragmentation of health information.\*  
Establishing a unified information system with in country.
- **Benefits of HMIS**

- Helping decision makers to detect and control emerging and endemic health problems.
- Help in monitoring progress towards health goals and promote equity.
- Empowering individuals and communities with timely and understandable health related information.
- Improving quality of services.
- **WORKLOAD MEASUREMENT AND STAFFING**
- **REQUIREMENTS:**
  - It helps to store, manipulate and retrieve large volumes of data.
- The information generated assists nursing managers in planning, monitoring and evaluating use of nursing resources on a daily basis and in the longer time frame.
- It is used to generate staff schedules.
- **STAFF SCHEDULING:**
- Nursing managers are able to plan schedules in advance with considerable time savings. Staffs are informed well ahead of time.
  - Staffing records, if maintained properly, provide useful information for monitoring absenteeism, scheduled time off, and turn over.

## ***.SANITARY VENDING MACHINE OPENING .....***

*Organisations are now more concerned about the hygiene and safety of their women staff and are sourcing solutions that provide safe and hygienic feminine hygiene solutions.*

*Thinking about India's sustainability initiatives, we are pleased to have introduced Sani Pro Green\* services, wherein the used sanitary napkins are collected from your premises and are recycled using a zero-waste low temperature thermal incineration process to generate reusable environment friendly products.*

*Ensuring we make the earth a greener and better place to live in.*

*Rentokil Initial Hygiene India provides end to end feminine hygiene services, so your female employees experience hassle free periods. Our comprehensive services include providing organisations with sanitary napkin vending machines, which provides immediate access to napkins for menstrual emergencies. We also provide safe and hygienic sanitary napkin disposal units, which ensures there is no cross contamination because of the used pads.*

*Smart vending machines are IoT enabled digitally connected machines with Touchless shopping for daily.*

*These smart vending machines are available for 24\*7 to dispense an product.*

*These machines can place at any locations such as Health care, Education, Pubilc Infrastructure, Residentials, Factories, etc.*

*Organisations are now more concerned about the hygiene and safety of their women staff and are sourcing solutions that provide safe and hygienic feminine hygiene solutions.*

*Thinking about India's sustainability initiatives, we are pleased to have introduced Sani Pro Green\* services, wherein the used sanitary napkins are collected from your premises and are recycled using a zero-waste low temperature thermal incineration process to generate reusable environment friendly products.*

*Ensuring we make the earth a greener and better place to live in.*

Our comprehensive services include providing organisations with sanitary napkin vending machines, which provides immediate access to napkins for menstrual emergencies. We also provide safe and hygienic sanitary napkin disposal units, which ensures there is no cross contamination because of the used pads.*

*April 7 of each year marks the celebration of World Health Day. From its inception at the First Health Assembly in 1948 and since taking effect in 1950, the celebration has aimed to create awareness of a specific health theme to highlight a priority area of concern for the World Health Organization.*

*Over the past 50 years this has brought to light important health issues such as mental health, maternal and child care, and climate change. The celebration is marked by activities which extend beyond the day itself and serves as an opportunity to focus worldwide attention on these important aspects of global health.*

## **...Celebrating World Yoga Day..**

*International Day of Yoga*

*21 June woman doing tree pose on mountain top*

*The practice of Yoga brings joy, health, peace from within and deepens a sense of connection between an individual's inner consciousness*

*9th International Day of Yoga*

*Yoga session led by H.E. Prime Minister, Shri Narendra Modi on 21 June 2023*

*The Permanent Mission of India to the UN, in collaboration with the UN Secretariat, organized the 9th International Day of Yoga at the North Lawn area of UN Headquarters, under the theme "Yoga for Vasudhaiv Kutumbakam" (Yoga for 'The World is One Family').*

*What is Yoga and why do we celebrate it?*

*Yoga is an ancient physical, mental and spiritual practice that originated in India. The word 'yoga' derives from Sanskrit and means to join or to unite, symbolizing the union of body and consciousness.*

*Today it is practiced in various forms around the world and continues to grow in popularity.*

*Recognizing its universal appeal, on 11 December 2014, the United Nations proclaimed 21 June as the International Day of Yoga by resolution 69/131.*

*The International Day of Yoga aims to raise awareness worldwide of the many benefits of practicing yoga.*

*The draft resolution establishing the International Day of Yoga was proposed by India and endorsed by a record 175 member states. The proposal was first introduced by Prime Minister Narendra Modi in his address during the opening of the 69th session of the General Assembly, in which he said: "Yoga is an invaluable gift from our ancient tradition. Yoga embodies unity of mind and body, thought and action ... a holistic approach [that] is valuable to our health and our well-being. Yoga is not just about exercise; it is a way to discover the sense of oneness with yourself, the world and the nature."*

*The resolution notes "the importance of individuals and populations making healthier choices and following lifestyle patterns that foster good health." In this regard, the World Health Organization has also urged its member states to help their citizens reduce physical inactivity, which is among the top ten leading causes of death worldwide, and a key risk factor for non-communicable diseases, such as cardiovascular diseases, cancer and diabetes.*

*But yoga is more than a physical activity. In the words of one of its most famous practitioners, the late B. K. S. Iyengar, "Yoga cultivates the ways of maintaining a balanced attitude in day-to-day life and endows skill in the performance of one's actions."*

*Dengue viruses are spread to people through the bite of an infected Aedes species (Ae. aegypti or Ae. albopictus) mosquito. These mosquitoes also spread Zika, chikungunya, and other viruses.*

*Almost half of the world's population, about 4 billion people, live in areas with a risk of dengue. Dengue is often a leading cause of illness in areas with risk.*

*Each year, up to 400 million people are infected by a dengue virus. Approximately 100 million people get sick from infection, and 40,000 die from severe dengue.*

*Dengue is caused by one of any of four related viruses: dengue virus 1, 2, 3, and 4. A person can be infected with dengue multiple times in their life.*

*The school had also arranged for a resting room for anyone who felt dizzy or sick after donating blood. Volunteers from a local club also had come to help*

*the school organise the blood donation camp. After the completion of the blood donation, the Principal thanked and appreciated everyone present in the camp.*

**.....REPORT.....**

*The Blood donation Camp continued till 3:0 pm. After that, the Chief Guest delivered the speech extolling those who had donated their blood. He told the audience that the donated blood would be used for saving the lives of the injured and the sick. One of the doctors also addressed the audience saying that the blood donation does not weaken the the donators. The recovery takes place very soon. He talked about facts/ myths/ Blood Groups related information.*

*The SDM also handed over the Certificates to the blood donators. It was followed by a Cultural Programme. The students of our school presented the cultural items. Everybody enjoyed that. The Blood Donation Camp was ended with National Anthem. It was certainly a memorable day for me. I, along with other people, decided to donate blood in future also.*
